# How to Make an 8 page ZINE out of 1 sheet of paper

You will need: plain 8 1/2 x 11 paper, pencil, scissors

1. Start with a plain sheet of paper and fold it in half. (8 1/2 x 11 paper works best)
   Line up the corners carefully as you fold.
2. Now unfold the paper and fold in in half the *other* way, carefully lining up the corners.
3. Fold that in half and fold in half again! Try to get your folds nice and crisp.
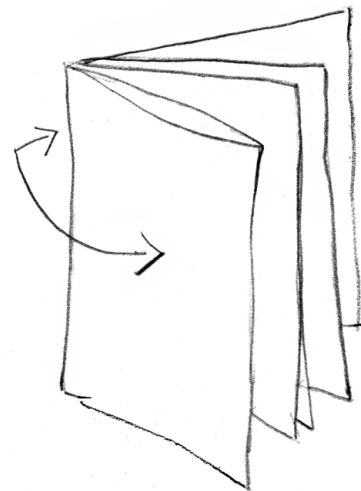

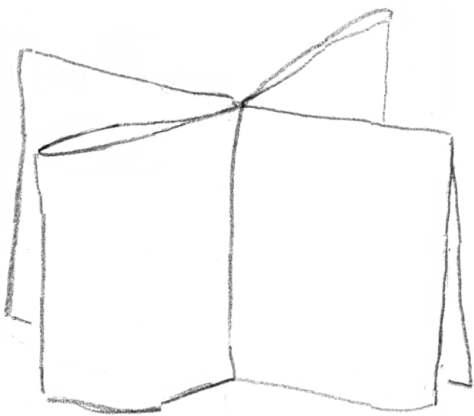

4. Unfold the paper and see that it is divided it into 8 parts – these will be the Zine pages.
5. Draw a line just as the diagram shows and put a small dot at both ends of the line.

6. Fold the paper in half so you can see your line,
then cut along the line but STOP at the dot.

7. Now fold the paper the other way, witih the cut on the top fold.
Take the ends in your hands and push them together slowly. The center will open up.

8. Smooth the pages together and fold them into a Zine

The rest is up to you – draw or write in your zine. Make a comic book, or keep a diary or use it
as a mini notebook. Now that you know how, its easy to make more Zines.
